- Etc.

QUALITY CONTROL

Thailand Anthracite emphasizes on high quality of products. We have an inspection process and product quality control system at every stage before distribution to customers.

Not only do we possess our own laboratory, we also employ independent and internationally recognized assurance appraisers to guarantee our high quality standard.

ANTHRACITE COAL

Anthracite coal : A premium-grade coal of the best quality. Known for its cleanliness and its sleek and glossy features, the Anthracite contains very high carbon (80-92%) , low moistness, high heat, generates little smoke and is hard to ignite

Anthracite coal is **used** in various industries:

Energy Generation Industry

Metals industry

water purification industry

Dark Glass Production Industry

Battery Case Production Industry

THERMAL COAL

Thermal coal : Also known as steam coal, is used for power and heat generation. We have a wide range of Thermal Coal:
Low, Medium and High calorific value

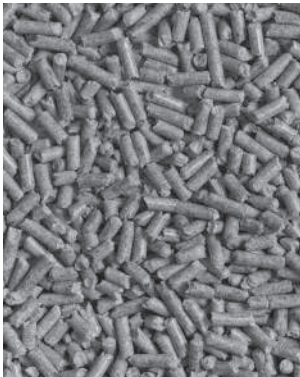

-  **Low** calorific value :
3400 GAR – 4200 GAR
-  **Medium** calorific value :
4800 GAR to 5000 GAR
-  **High** calorific value :
5400 GAR to 7000 GAR

BIOMASS FOR ENERGY

Biomass for energy : In order to fulfill the growing demand of biomass energy uses around the world by providing high quality and flexible biomass solutions, in response to new challenges of the energy market, and to mitigate the harmful effects of global warming and climate change

Wood Pellets

Palm Kernel Shell

Biomass Pellets

Wood Chips

LOGISTICS

*Thailand Anthracite handles physical delivery from loading origins
until our customer's discharging port
via our efficient in-house logistic operations*

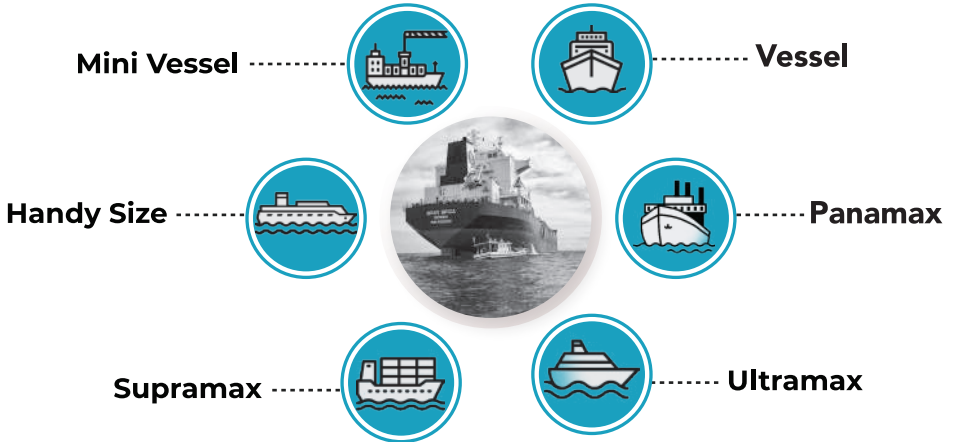

In-House ship operations

We have our own in-house team focusing on the global transportation of dry bulk cargo, providing a full range of services covering the entire supply chain.
